

When one person commits, you can trust.

Imagine when 22,000 people do it.

When TAM was established over 30 years ago, it was not meant to be just one more airline carrier, but a company of aviators with a passion for flying and service. Currently, we fly to 17 international destinations: Europe, South America and the United States for the past 10 years. In Brazil we fly to 42 cities. Today, we are the largest airline carrier in Latin America, dedicated to refining our services, making this our commitment, our brand. This brand is not simply a symbol but a company, in other words, a registered trademark.
